

# RAZEEMA R C

## Software Engineer | Full Stack Developer

Location: Chennai, Tamil Nadu, India (Open to relocation)  
Phone: +91 9385815899 | Email: razeemarc@gmail.com  
LinkedIn: linkedin.com/in/razeemarc | GitHub: github.com/razeemarc

### PROFESSIONAL SUMMARY

Full Stack Software Engineer with **2.2 years of professional experience** building scalable web applications using **Node.js, React.js, Next.js, Go (Golang)**, and SQL databases. Experienced in designing secure REST APIs, developing responsive user interfaces, optimizing application performance, and deploying production-ready solutions on AWS using Docker and CI/CD pipelines. Strong understanding of Agile development, cloud technologies, and modern software engineering best practices.

### EDUCATION

|                                                                                                       |                                     |
|-------------------------------------------------------------------------------------------------------|-------------------------------------|
| <b>B.Tech Information Technology</b><br>University College of Engineering Nagercoil, Tamilnadu, India | June 2020 - April 2024<br>7.87 CGPA |
|-------------------------------------------------------------------------------------------------------|-------------------------------------|

### TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, SQL, HTML5, CSS3  
**Frontend Technologies:** React.js, Next.js, Redux, Zustand, Tailwind CSS,  
**Backend Technologies:** Node.js, Express.js, REST APIs, Microservices  
**Databases& ORMs:** PostgreSQL, MongoDB, MySQL, Redis, Prisma ORM, TypeORM  
**Authentication & Security:** JWT, OAuth 2.0, NextAuth.js, Role-Based Access Control (RBAC), Secure API Design  
**DevOps & Deployment:** Docker, CI/CD, Git, GitHub, Nginx, Agile/Scrum, PM2, AWS (EC2, RDS, Amplify, S3)  
**Testing & Tools:** Jest, Playwright, Unit Testing, Postman

### EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                         |

| <b>Kosal IT Solutions — Software Engineer</b><br><ul style="list-style-type: none"><li>Engineered scalable Go (Golang) backend services powering multiple healthcare modules, including appointments, pharmacy, laboratory, and blood bank workflows.</li><li>Improved API performance by optimizing PostgreSQL queries, indexing strategies, and backend business logic for faster response times.</li><li>Built secure production-ready REST APIs using JWT authentication, RBAC, and Clean Architecture to ensure scalable and maintainable backend services.</li></ul> | Feb 2026 - Present      |
| <b>Supportta Solutions Pvt Ltd — Full Stack Developer   Team Lead</b><br><ul style="list-style-type: none"><li>Developed end-to-end full-stack solutions across <b>3 production applications</b>, translating business requirements into scalable software.</li><li>Engineered secure REST APIs and streamlined backend workflows, improving application performance and system reliability.</li><li>Automated cloud deployments with <b>zero downtime</b> while leading developers through technical mentoring, code reviews, and production releases.</li></ul>          | May 2025 - January 2026 |
| <b>DigiSailor — Full Stack Developer</b><br><ul style="list-style-type: none"><li>Developed <b>end-to-end full-stack applications</b>, taking ownership from <b>system design</b> through production deployment.</li><li>Engineered <b>high-performance REST APIs</b>, improving request handling, backend scalability, and overall application responsiveness.</li><li>Created <b>responsive user interfaces</b> and deployed applications on <b>AWS</b> using <b>Docker</b>, ensuring reliable releases and high availability.</li></ul>                                 | May 2024 - May 2025     |

### PROJECTS

|                                                                                                                                                                                                                                                                              |                     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Aivida Healthcare Platform — Backend Engineer</b><br><ul style="list-style-type: none"><li>Developed scalable healthcare backend services using <b>Go (Golang)</b> and <b>PostgreSQL</b>, supporting appointment, pharmacy, laboratory, and blood bank modules.</li></ul> | Feb 2026 - Jun 2026 |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|

- Improved application performance by developing RESTful APIs and optimizing SQL queries for efficient data processing.
- Integrated JWT authentication and Role-Based Access Control (RBAC) to secure backend services using Clean Architecture principles.

**Tech Stack:** Go (Golang), PostgreSQL, SQL, REST APIs, JWT, RBAC, Docker, Clean Architecture

**Rent-O-Rent (SaaS Platform) — Full Stack Developer | Project Lead** Oct 2025 - Dec 2025

- Led full-stack development of a **SaaS rental platform** using Next.js, Node.js, and TypeScript for production deployment.
- Created responsive product browsing, cart management, and checkout workflows, reducing cart abandonment by **25%**.
- Integrated Razorpay Payment Gateway and enhanced MongoDB query performance by **30%** through schema optimization.

**Tech Stack:** Next.js, Node.js (Express.js), TypeScript, MongoDB, JWT, Razorpay, REST API

**E-commerce Platform — Full Stack Developer | Project Lead** Jul 2025 - Sep 2025

- Developed a complete e-commerce platform using Next.js and Node.js, serving **1,000+ daily users** with **30%** faster response times.
- Applied Next.js SSR, SSG, CI/CD pipelines, and Nginx deployment to improve SEO, application performance, and achieve **99.9% uptime**.

**Tech Stack:** Next.js, React.js, Node.js, Express.js, TypeScript, MongoDB, Razorpay, Nginx, Tailwind CSS

**ANZ API Developer Portal — Backend Developer** Apr 2024 – May 2024

- Developed an API Developer Portal with React.js frontend and Node.js microservices backed by PostgreSQL, serving **200+ users**.
- Built intuitive dashboard interfaces and applied Backend-for-Frontend (BFF) architecture to strengthen API security.
- Enhanced API performance by **30%** using Redis caching and Docker-based containerized deployments.

**Tech Stack:** Node.js (Express.js), PostgreSQL, Redis, Docker, Jest, Microservices

LANGUAGE SKILLS

---

- English (Proficient)
- Tamil (Native)
- Malayalam (Conversational)

CERTIFICATIONS

---

- Docker - Udemy (2024)
- ReactJS - Infosys Springboard (2024)
- JavaScript - GUVI (2023)
- SQL (Basic) Assessment - HackerRank (2024)
